OEM-QUALITY TOP DRIVE SERVICE LOOPS FOR OFFSHORE DRILLING OPERATIONS

Since 1993, AmerCable has been producing high-quality top drive service loops for the offshore market. Our professionally engineered service loops are built to withstand hazardous operating conditions and dynamic stress. All service loops for offshore operations are engineered and produced at our state-of-the-art cable and service loop production facilities.

- Fully potted
- 300V – 15kV AC
- DC Power
- Composite Power & Control
- Instrumentation
- Thermocouple
- Quick disconnects
- Fiber- or Electro-Fiber-Optic

AmerCable offers a standard line of top drive service loop packages, including:

NOV (VARCO)

TDX-1500
TDX-1250
TDX-1000
TDS-1000
HPS-03-1000
HPS-750
TDS-8SA
TDS-4S

*What can you
expect from
AmerCable
Systems?*

- Outstanding engineering and technical support
- Great customer service
- Short lead times
- Reliable on-time deliver

CUSTOM SERVICE LOOP SOLUTIONS FOR DEEP WATER DRILLING OPERATIONS

AmerCable has been producing unique dynamic service loops for more than 25 years. The knowledge during this time has allowed us to provide the leading-quality top drive service loops for highly-specialized, deep water operations.

Experience, continuous analysis and ongoing improvement of our service loops, combined with customer input, lets us deliver the right product for specific drilling applications. All design features are focused on enhancing safety and reducing downtime.

SERVICE LOOP DESIGN

Safety

Our number one priority is always end-user safety.

Strength

Engineered service loop designs are optimized for extended service life.

Connectivity

Expert connector technicians assure best terminations on each conductor.

Flexibility

Varying the stranding for specific applications results in the most flexible loops in their class.

Protection

The highest quality components and innovative solutions protect loops in the harshest environments.

SERVICE LOOP MANUFACTURING

Core bundles, specifically designed for longer service life, are expertly produced at our 600,000 sq. ft. El Dorado, Arkansas cable manufacturing facility.

Service loops are completed at our 100,000 sq. ft. manufacturing facility in Houston, Texas. Cable bundles are inserted in a protective hose and fully potted.

Our highly experienced technicians add couplers/connectors as specified.

Each loop is computer tested on 12 Quality Assurance Points which are focused on Critical-to-Quality (CTQ) features.

Complete loops are packaged in weather-resistant crates.

Made in America
